

BUILD GREEN

INTENSIVE 5 DAYS SUSTAINABILITY TRANSFORMATION LEADERSHIP WORKSHOP

VENUE : SINGAPORE

DATE: : 31st August- -4th September 2015

TOPICS

- Green Architecture and Design
- Energy Efficient Design for Cooling and Lighting Requirement
- Effective Artificial and Day Lighting Study
- Indoor Air Quality
- Construction Environmental Management
- Water Efficient Design
- Energy and Water Consumption Index
- Green Plot Ratio
- Sustainable Materials and Resources
- Concrete Usage Index
- Envelop Thermal Transfer Value Computation
- Green Building Finance

Speciality Focus

- Sustainable Urban Planning
- Sustainable Low Cost Housing

Site Visits

- Housing and Development Board, Singapore (Public Housing)
- Zero Energy Building at BCA Academy

Registration Fees:

USD800.00

Registration and Enquiries to: workshop@tzgbc.com

Payment to: admin@greenaconsultants.com

Registrations close 22nd June 2015

Organized By:

Strategic Partner:

GreenA
Consultants

Fully Supported By:

Punggol 21

Punggol New Town is located at the northeastern part of Singapore. Under the “Punggol 21” plan, this new waterfront town is on its way to become Singapore’s New-age town filled with residential HDB flats, Condominiums, recreational facilities and a waterfront living centre.

New projects with an eco-friendly focus represent a fresh, exciting approach to quality housing. Recently completed homes such as Treelodge@Punggol already incorporate green features such as solar panels and rainwater harvesting.

Future developments in Punggol will build on these eco-friendly design principles. Seven distinct waterfront districts, well-integrated with amenities, will be developed in the town, each with a unique theme. These districts will also be set amongst greenery and planned for walkability.

KEY HIGHLIGHTS:

1. New and better housing choices
2. Rejuvenating mature towns
3. Enhancing quality of life

Utilization of Pre-cast concrete

Interior of a home in Punggol

Punggol Masterplan

Six Battery Road (High Rise Commercial Building)

Buildings account for 40% of the global energy consumption. Buildings can significantly reduce their operating expenses by undergoing energy efficiency retrofits.

Learn how Six Battery Road put in additional “green features” for environmental sustainability and achieved an improvement of about 20% for the Energy Efficiency Index, recovered waste energy and generated “green” energy, installed rainwater harvesting systems to provide efficient irrigation to maintain the “green” wall, reduced use of artificial lightings by installing solar light tubes which harvest daylight to generate light, as well as encouraged the use of energy-efficient vehicles by allocating reserved parking lot for hybrid and electric vehicles.

Zero Energy Building at the BCA Academy

The Zero Energy Building (ZEB) at the BCA Academy is the first existing building in Singapore to become a zero energy building with a vast array of roof-mounted solar panels to power office equipment, air-conditioning and lighting. Other Green features include solar-assisted stack ventilation systems, mirror ducts to reflect sunlight into the building and high performance glazing.

FAQ

What does the registration cost (USD800) cover?

- Course fees over the duration of the 5 day workshop
- Transportation to and Access to the BEX Asia Build Eco Xpo, held at Marina Bay Sands
- Transportation and guided tour for site visits.
- All meals: Tea Breaks, lunch as well as dinner. (Breakfast is to be provided by Hotel)
- 2 way airport transfer

*Participants will only need to pay for flight tickets and accommodation.

Costs of Visiting Singapore (All prices reflected are in USD)
